Washington, Feb. 20 .- A reduction in a ten to \$2 a ten; the placing of ground wood on the free list, and the establish ment of a duty for one-twelfth of a cent per pound on mechanically ground wood pulp, are the unanimous recommendations of the select committee on the select committ pulp and paper investigation which ing a dispete over the possession of made its report to the House yester some fox skins.

process, sulphite process, and the soda process. The cheaper grades of paper are usually produced by mechanical mixing ground wood pulp with other kinds of pulp in different degrees of percentage. The ordinary news print paper is generally produced by the use of about 80 per cent. of ground wood and about 20 per cent. of sulphite wood. Whether other kinds of wood be sides spruce can 'profitably used for the production of cheap print paper is a matter concerning which there is some difference of opinion."

The report states that it would seem that the production of news paper or the other very cheap grades of paper are today dependent upon the continu-ation of cheap ground wood produced from spruce trees, and that that condi-tion is likely to prevail in the future. The amount of spruce consumed in the United States, according to the report, in 1907 was about 1,260,000 cords for md wood, about 1,420,000 cords for sulphite fibre, and about 3,450,000 cords for lumber. The amount of standing spruce is variously estimated but is roughly guessed to be about 70,000,000 cords east of the Rockies.

UNCLE IN PLOT TO OUST CZAR

Story That the Reactionaries Planned a Regency

UNDER THE GRAND DUKE

Was Ended by Sudden Death-Scheme Uncovered, According to Russian Judicial Official, Through Azef and Lukopine Cases,

St. Petersburg, Feb. 20 .- A sensational story of a reactionary plot to dethrone Emperor Nicholas and proclaim a regency in Russia, is being related in St. Petersburg today in connection with the recent death of Grand Duke Vlad-inir Alexandrovitch, the emperor's old-
